

AI & Automated Costing: The New Standard in Manufacturing

Oct. 15, 9:00–17:00 | MünchenH0CH5

The Leading Event for Modern Cost Engineers

Over one day in Munich, senior decision-makers from automotive, machinery and industrial sectors will share how they turn data into decisions and methodology into measurable impact. **Now partner of A2MAC1, Tset is widening this conversation** – connecting global benchmarking expertise with the future of cost engineering.

This Year Cost Engineering Meets The AI Era

Full day, 9:00–17:00 (+ open-end networking)

AI is rewriting the cost engineering playbook. This summit shows how leading manufacturers are putting AI and automation to work in costing today, with real commodities, real time savings, real business impact.

- **The methodology question:**
Bottom-up vs. top-down
- **Scaling with AI Data Agents:**
From 700 to 3,000+ calculations – what's automatable today, and where it still falls short
- **Technology Module Framework (TMF):**
Build, adapt, or bring your own Excel logic into Tset Studio – versioned, deployed on your schedule
- **Costing Intelligence Platform:**
Benchmark data meets costing execution for one fact-driven view across the product lifecycle
- **From knowing to doing:**
Turning cost insight into systematic action

Where Practitioners Shape What's Next

These use cases and frameworks aren't theory, they're being implemented right now by the people running cost engineering inside their organizations. At Tset Summit, senior practitioners take the stage to share how they're putting AI and automation to work today.

- See use-cases in action, told firsthand by the people who implemented it
- Network with Manufacturing Executives and top Procurement Leaders
- Gain insights from Senior Cost Engineers
